

MANAGEMENT *and* MANUFACTURING *of* MOLDS

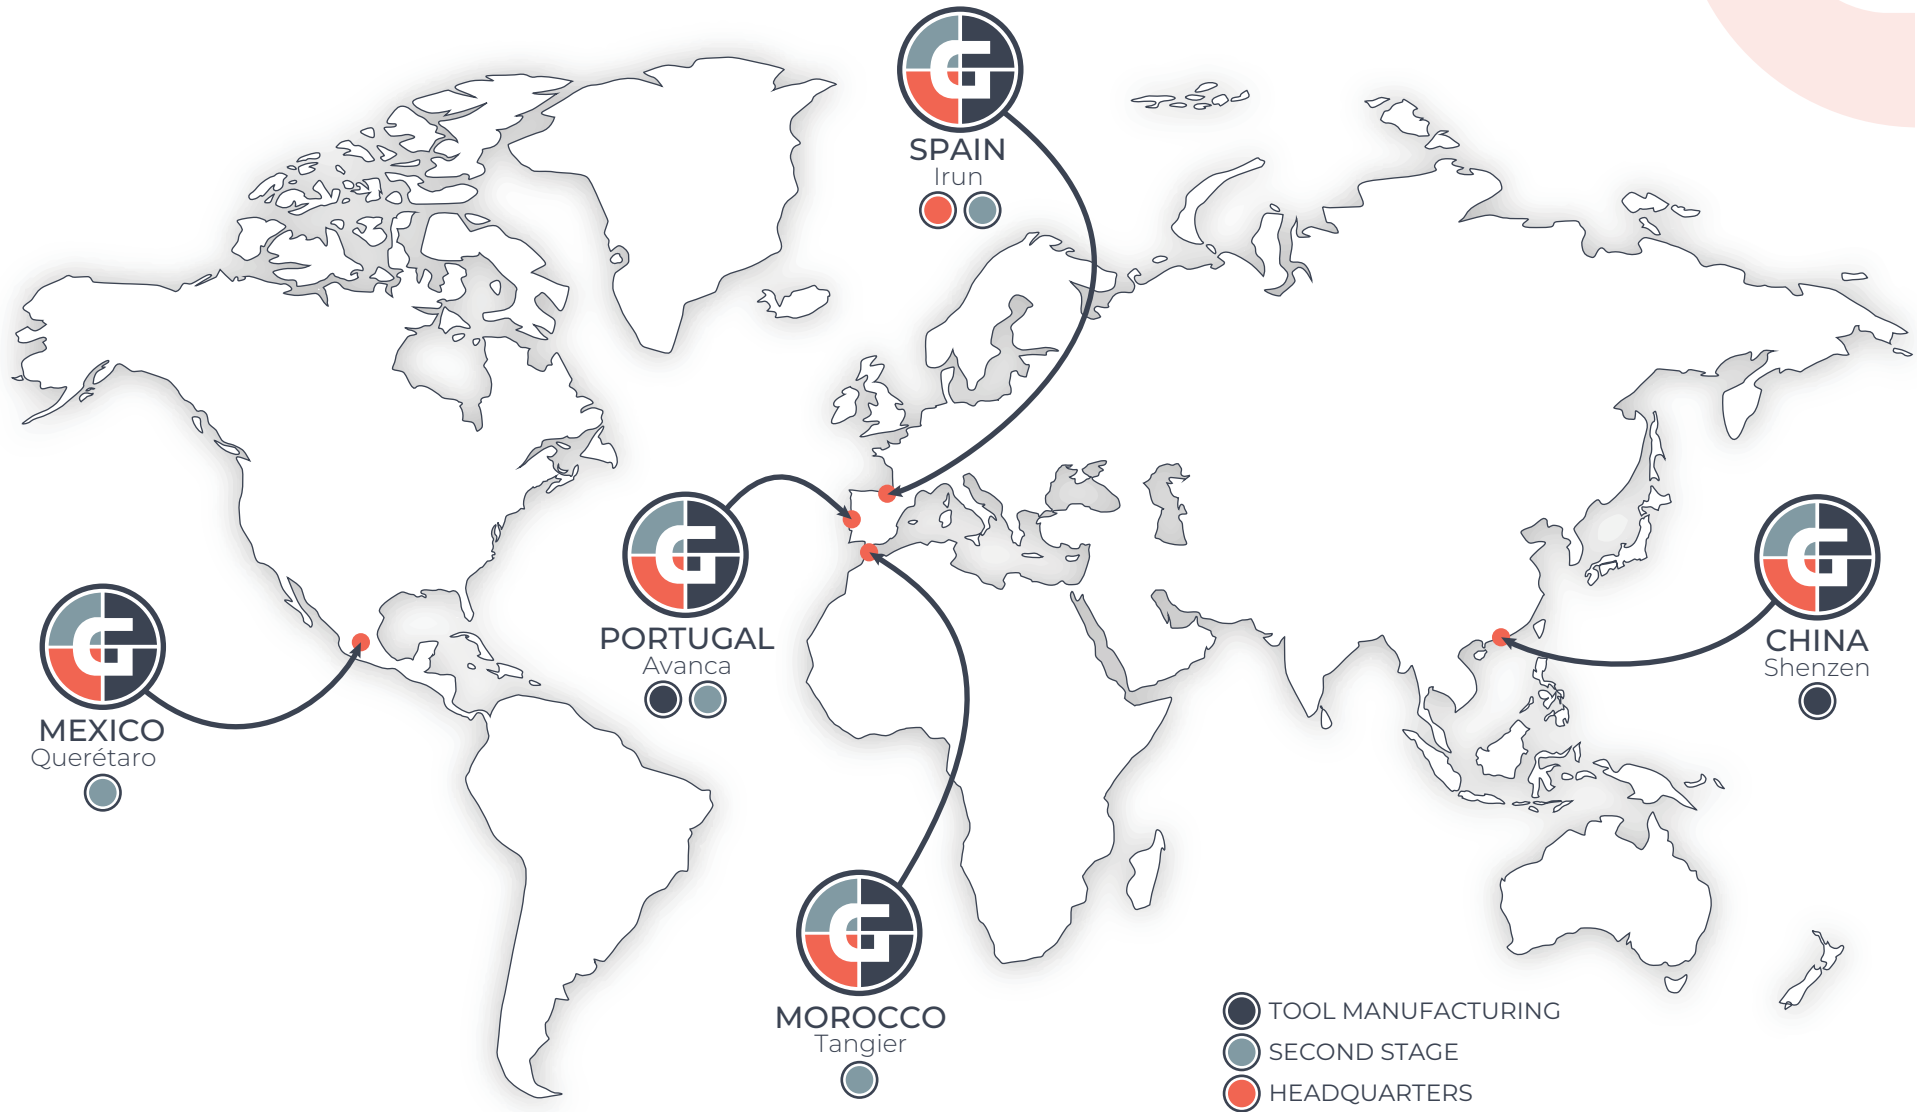

HISTORY

- 1998** Madrid
Started as a **CAD/CAM office** in a mold manufacturing workshop.
- 2000** Irun
Opened office to provide **CAD and CAM programming services** for the tooling industry.
- 2006** China
Established a technical team in China to **oversee and support ongoing projects locally**.
- 2012** Portugal
Opened new office in Avanca with **technical staff to follow up projects**.
- 2018** Mexico
Joint Venture with our Chinese partner Losang to give 2nd Stage **Service in Silao**.
- 2021** Morocco
Joint Venture with our Chinese partner Losang to give 2nd Stage **Service in Tangier**.
- 2024** International
Started with a **new technology – Micro Stress** – at an international level.
- 2026** Mexico
New office in Querétaro inside a tool shop to **provide local support**.

Headquarters with a highly professional and hardworking team dedicated to manufacturing molds for the injection and rubber compression sectors.

Thanks to our diverse capabilities, we are able to leverage other factories within the group, allowing us to diversify workloads and achieve a production capacity of approximately 60 molds per year.

With our second-stage workshops in Mexico and Morocco, we offer end-to-end service to our customers, including comprehensive after-sales support.

We are in **Irun**.

Resp.
DAVID HONTORIA

GEOCAD PORTUGAL

A highly skilled team dedicated to the manufacture of plastic injection molds, using the latest technology and handling mold weights of up to 40 tons. Our employees ensure efficient, high-quality work focused on delivering the solutions and alternatives our clients need.

Our experienced engineering offices play a key role in the success of your projects, providing expertise and support throughout every stage of development.

We are in **Aveiro**.

Resp.
JOÃO SILVA
PEDRO PINTO

Established in 2010, dedicated to the manufacture of molds for the plastics injection with the maximum weight of 20T. Our skilled staff in China follow up precisely the information received by our team in Spain or Portugal.

With a brand-new facility and machinery our partners contribute to Geocad Group with precise manufacturing following European Standards.

We are in **Shenzen**.

AUTOMOTIVE PLASTIC INJECTION

AUTOMOTIVE SMC/LFT (Compression)

AUTOMOTIVE RUBBER INJECTION

ELECTRICAL SECTOR RUBBER

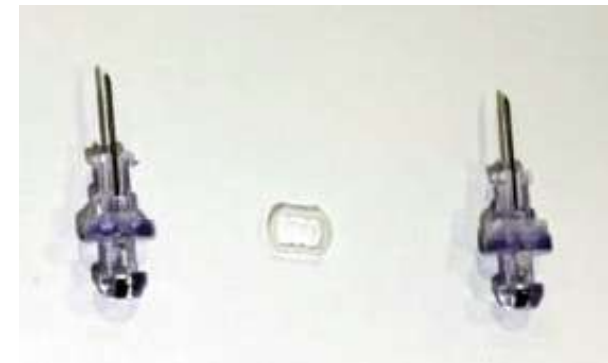

LSR INJECTION LIQUID SILICON RUBBER

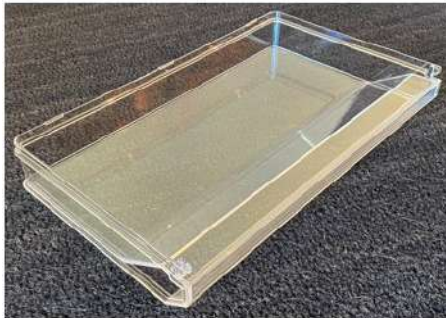

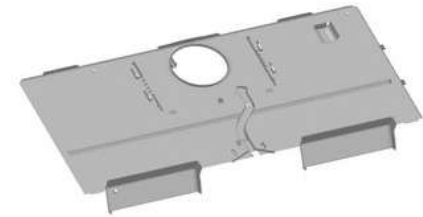

- LSR Tooling design and manufacture
- Arburg LSR injection machine in Class 7 clean room
- Mold type includes single to multi-cavity, and overmold.

OTHER SECTOR PLASTIC INJECTION

MICRO-STRESS

New technology developed in collaboration with Losang that **integrates manufacturing and injection processes.**

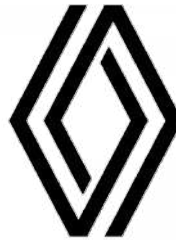

It allows the production of defect-free parts, eliminating subsequent stages such as painting. This innovation seeks to increase efficiency, reduce rejects and minimise environmental impact.

Following five years of dedicated development, Micro-Stress is strategically positioned to serve industries such as automotive, white line and home appliance sector, where dimensional stability and superior surface finish are critical requirements.
