Management and Manufacturing of MOLDS

SPAIN – PORTUGAL – CHINA
MEXICO - MOROCCO

www.geocad.es

CERT
ISO 9001
1998. Geocad was established in Madrid due to the need for a CAD/CAM office in a mould manufacturing workshop.

2000. We opened our office in Irun to provide mould design (CAD) services and to implement manufacturing programs for machine tools (CAM).

2005. We began to provide technical/commercial support to mould companies in foreign-speaking countries (English/French), and following up manufacturing projects.

2006. We entered into the Chinese market through Faurecia following Second Stage projects in Europe and Asia.

2009. Geocad positioned itself in China with technical staff who keep track of the different projects.

2010. Geocad positioned itself in Portugal, in order to give a better support to our customers.

2013. We created Geocad Group, which is a Partnership between 2 companies in China and one in Portugal.

2016. Geocad signs and agreement with Polymeri Iranian Company to be represented in IRAN.

2018. Joint Venture with our Chinese partner to give 2nd Stage Service in Leon (México)

2020 NEW!! Joint Venture with our Chinese partner to give 2nd Stage Service in Tangier (Morocco). This plant will be ready at the beginning of 2021.
LOCATION
AREAS OF BUSINESS

- Automotive
- Railway
- Agricultural
- White Appliance
- Packaging
GEOCAD is a company dedicated to the Management and Manufacturing of Moulds for Injection (2K, Stack tools, GiD Injection, Foaming) and Compression moulding (LFT, SMC, GMT...).

**Mould Management and Manufacturing**

- Attendance and testing
- Receiving moulds
- Testing
- Modifications (ECR)
- Dismantling and textures
- Shipping parts
- Adjustments
- Shipments to final plant

**Second stage**

**Other services**

- Concept and Tool design
- Reverse engineering
- Moldflow
- Dimensional control
- Fixtures Manufacturing
- Injection and testing
A Team dedicated to the manufacture of molds for the plastics injection with the latest technology up to maximum weight of 40T. The vast experience of our employees and dedication, results in efficient and quality work, with the aim of seeking solutions and alternatives, that our customers need. Our proactive and experienced Engineering office is the key of success for your projects. We are located in OLIVEIRA DE AZEMEIS.
Established in 2010, dedicated to the manufacture of molds for the plastics injection with the maximum weight of 20T. Our skilled staff in China follow up precisely the information received by our team in Spain or Portugal. With a brand new facility and machinery our partners contribute to Geocad Group with precise manufacturing following European Standards. We are located in Shenzen.
AUTOMOTIVE SECTOR

PLASTIC INJECTION

Grupo GEOCAD together with two partners join their strong points to give an effective solution after sales market service for plastic parts producers. Currently we are located in Portugal, México and building the new plant in Tangier (Morocco) which will be ready at the beginning of 2021. Therefore, GEOCAD will be responsible both for Commercial relations with customers and Project Management while our partner will be responsible for Tools maintenance and modifications.

Silao (Guanajuato, México)  Oliveira de Azeméis (Portugal)  Tangier (Morocco)
CHECKING FIXTURES

Once the tools are done in China, we offer the option of manufacturing the checking fixtures as well together with the CMM part reports assuring before tools arrive to customer that they fulfill dimensionally according to cad data.

Over a surface of 5000 m² and annual capacity of 1500 checking fixtures manufacture we can satisfy our customer requirements both quality and delivery time.
